

## Learn How to Remove Mold Naturally

PLUS - Safe and powerful approach in the battle against bacteria, germs, fungus and viruses all year round

- Chlorine particles, according to some reports, may bio-accumulate in the Thyroid leading to reduced thyroid function and possibly thyroid cancer.
- A study carried out in Hartford Connecticut, found that; “women with breast cancer have 50% to 60% higher levels of organochlorines (chlorination byproducts) in their breast tissue than women without breast cancer.”
- US University Study Discovers **Bleach is Ineffective at Killing Mold** on Wood and Other Porous Surfaces. Bleach cannot penetrate into mold's tiny roots, but the water part of the formula will, thus fostering more, even stronger mold growth.

- Edward Close, PhD, a **mold remediation consultant** with **30 years experience** in the environmental industry, was asked to do third-party sampling for mold in an apartment complex that had been flooded, evacuated, and later put up for sale. The buyer who was renovating the apartments had paid a company which had used the strongest stuff they knew of—a hospital disinfectant. Yet Dr Close's sampling showed that either the product had not killed the mold or that the mold had already re-established itself. After much urging by his wife, he diffused Thieves oil in the apartments for a 24-hour period. **The research project yielded astonishing results!** And two weeks later they were even more astonishing!

**Mold expert stumbles upon an amazingly powerful and non-toxic method of toxic mold removal...in his wife's aromatherapy kit**

- Independent Testing's have been done extensively at College Universities, and have found antimicrobial effects against unwanted microorganisms. Thieves works **during and AFTER** it has been dispensed. Where as bleach or chemical application does not kill the root of the mold or virus. Bleach also releases toxic fumes and does not eliminate mold. It also comes back where as **Thieves prevents the re-growth.**

## Learn How to Remove Mold Naturally

PLUS - Safe and powerful approach in the battle against bacteria, germs, fungus and viruses all year round

*It's a rough world we live in today. The germs, bacteria and respiratory viruses that surround us have never been stronger or more antibiotic-resistant.*

*Diffusing is a simple and effective way to use Therapeutic Grade A essential oils. Provide an array of benefits such as easing stress, eliminating toxic mold, helping to decongest lungs and sinuses, supporting the immune system or just cleansing the air of odor.*

### **Micro-organisms cannot develop an immunity to therapeutic grade essential oils**

*this is what makes them so effective as natural antibiotics, disinfectant hand soaps, hand sanitizers and cleansers.*

*The pharmaceutical companies creating "super antibiotics" to which microorganisms will eventually become resistant. Ultimately this creates "super-bugs." Against which you need stronger antibiotics. Antibiotics, kill off all your helpful intestinal bacteria as well, setting you up for a huge fungal infestation and a compromised immune system.*

*You have Grade A essential oils like clove, lemon, cinnamon, Eucalyptus radiata, and rosemary, all found in Young Living Thieves, where each batch is slightly different from the next. Microorganisms cannot develop a resistance to them. They are highly effective, natural antibiotics. And because they are from living plants, they are similar in chemical makeup to our bodies. They work in harmony with our bodies. They do not create microbial upset in our digestive tract and they do not create "super-bugs." They keep microorganisms guessing!!*

*That's why it's more important than ever to keep your body on alert against attacks to your immune system.*

*Whether you're trying to battle the "bug" at the office or warding off household germs that family members leave behind, the arsenal of natural Thieves-enhanced products delivers positive antiseptic benefits to cleanse, calm and sooth you—body and soul.*

**THIEVES** was tested at Weber State University and found to be highly effective against airborne bacteria as it contains clove, lemon, eucalyptus radiata, rosemary and cinnamon.

## Learn How to Remove Mold Naturally

**PLUS - Safe and powerful approach in the battle against bacteria, germs, fungus and viruses all year round**

### How much should I order to eliminate my black mold problem?

1 Bottle of the [Thieves Oil Blend](#) -15 ml (#3423) 1 [Thieves Household Cleaner](#) (#3743) [TheraPro Premium Diffuser](#) (4495)

These items are sufficient for about 1,000 square feet of space. Add one additional bottle of Thieves Essential Oil for each additional 1,000 sq.ft. of space.

### How should I use these products once I get them?

**FIRST: Professional Mold Sampling** Have an environmental professional, an engineer, an industrial hygienist, or an indoor air quality specialist with proper credentials, equipment, and experience in doing mold sampling to come in, sample, and find out what kind of mold you have and at what levels.

**SECOND: Diffuse the Thieves Oil Blend** After Sampling is completed, the next step is to diffuse the Thieves oil blend continuously (non-stop) for a minimum of 24 hours in the room or rooms where you have mold. Determining how long to diffuse is related to how serious the mold infestation.

**THIRD: Clean up with the Thieves Household Cleaner** After sampling and diffusing have been completed, then clean areas with visible mold using the *Thieves Household Cleaner* (it contains the *Thieves* essential oil blend). Use appropriate protective equipment.

After diffusing is completed, clean visible mold and stains with the recommended Household Cleaner, undiluted. Use protective equipment and take precautions to avoid contact with and breathing mold spores while cleaning. Even dead mold spores can cause allergic reactions, so protective equipment is highly recommended.

## Learn How to Remove Mold Naturally

**PLUS - Safe and powerful approach in the battle against bacteria, germs, fungus and viruses all year round**

### **Can people be present in a room the entire time you are diffusing or should they stay in another room?**

Yes, the blend of oils is non-toxic. However, due to the presence of Cinnamon and Clove in the essential oil blend, it is recommended that you limit each exposure to between 10 and 30 minutes and no more than 3 times daily until the individual effects of diffusing are determined. Individuals have different body types, different blood types, different blood chemistry, different sensitivities. Therefore, it is better to err on the side of caution.

In most circumstances, when diffusing for prevention (i.e. when diffusing for no more than 15 to 30 minutes at a time) people, children and pets may be present.

When diffusing continuously for 24 hours or more, it is strongly recommend that the room or rooms where you are diffusing be closed and sealed and that people, children and pets not be present in the room.

This will facilitate maximum penetration and absorption of the Thieves essential oil blend into the mold and the porous materials in the room, recommended that you limit each exposure to between 10 and 30 minutes and no more than 3 times daily until the individual effects of diffusing are determined.

### **Prevent Mold from Returning**

**Question:** If we have successfully remediated mold, how do we prevent the mold from returning?

**Answer:** After mold remediation efforts are complete, we recommend diffusing the oil blend for 15 minutes every 3 hours, or you may instead diffuse the oil blend for 8 hours, non-stop, once a week as a preventative measure.

### **How do we keep mold from developing if we do not currently have a mold problem?**

**Answer:** To prevent mold from developing in a space, diffuse the Thieves essential oil blend (using the recommended cold-air diffuser) for 15 minutes every 3 hours on a daily basis, or you may instead diffuse the Thieves essential oil blend once a week, continuously for 8 hours (non-stop).

While there are countless ways to use Thieves essential oil blend by itself, Young Living has also created a full line of Thieves Oil enhanced products to enhance our healthful life style.
